Professional Experience

Software Development Engineer (SDE)
Kalam Solutions Pvt. Ltd

May 2022 – Oct 2023

Key responsibilities:

- **Frontend Web Development:** Responsible for creating and maintaining the frontend of web applications using *React JS*.
- **Mobile App Development:** Extended my skills to develop an Android mobile application for the same web application, leveraging *React Native*.
- **Feature Implementation:** Implemented new features and functionalities with focus on optimizing performance and ensuring the utmost usability for end-users. Effectively harnessed the power of *Redux* to manage application state, ensuring a smooth and responsive interface.
- **Defect Resolution:** Active participation in identification and resolution of software defects involving thorough testing, debugging and maintaining a stable and reliable application.
- **Collaboration with Backend Team:** Actively worked with the backend team to ensure that the frontend seamlessly integrates with the backend code, which is developed using *Node JS*.
